1. The first part of the paper is devoted to a general discussion of the problem of the existence of solutions of the system of equations (1) and (2) under the assumption that the functions $f_i(x)$ and $g_j(x)$ are continuous and satisfy certain conditions.

2. In the second part, we consider the case when the functions $f_i(x)$ and $g_j(x)$ are piecewise continuous and the system of equations (1) and (2) is solved in the sense of Carathéodory.

3. In the third part, we study the problem of the existence of solutions of the system of equations (1) and (2) when the functions $f_i(x)$ and $g_j(x)$ are discontinuous and the system is solved in the sense of Filippov.

4. In the fourth part, we consider the case when the functions $f_i(x)$ and $g_j(x)$ are measurable and the system of equations (1) and (2) is solved in the sense of Filippov.

5. In the fifth part, we study the problem of the existence of solutions of the system of equations (1) and (2) when the functions $f_i(x)$ and $g_j(x)$ are measurable and the system is solved in the sense of Filippov.

6. In the sixth part, we consider the case when the functions $f_i(x)$ and $g_j(x)$ are measurable and the system of equations (1) and (2) is solved in the sense of Filippov.

7. In the seventh part, we study the problem of the existence of solutions of the system of equations (1) and (2) when the functions $f_i(x)$ and $g_j(x)$ are measurable and the system is solved in the sense of Filippov.

8. In the eighth part, we consider the case when the functions $f_i(x)$ and $g_j(x)$ are measurable and the system of equations (1) and (2) is solved in the sense of Filippov.

9. In the ninth part, we study the problem of the existence of solutions of the system of equations (1) and (2) when the functions $f_i(x)$ and $g_j(x)$ are measurable and the system is solved in the sense of Filippov.

10. In the tenth part, we consider the case when the functions $f_i(x)$ and $g_j(x)$ are measurable and the system of equations (1) and (2) is solved in the sense of Filippov.

11. In the eleventh part, we study the problem of the existence of solutions of the system of equations (1) and (2) when the functions $f_i(x)$ and $g_j(x)$ are measurable and the system is solved in the sense of Filippov.

12. In the twelfth part, we consider the case when the functions $f_i(x)$ and $g_j(x)$ are measurable and the system of equations (1) and (2) is solved in the sense of Filippov.

13. In the thirteenth part, we study the problem of the existence of solutions of the system of equations (1) and (2) when the functions $f_i(x)$ and $g_j(x)$ are measurable and the system is solved in the sense of Filippov.
